PROFESSIONAL SUMMARY

Cybersecurity graduate with a concentration in AI Generation, ISO/IEC 27001 Lead Auditor, and former U.S. Army 35F Military Intelligence Analyst with a record of risk-focused analysis, sensitive-information handling, evidence review, executive reporting, process improvement, and disciplined execution in high-accountability environments. Applies Governance, Risk, and Compliance (GRC) principles through risk registers, control mapping, policy and procedure analysis, audit evidence, remediation tracking, business impact analysis, and NIST-aligned security documentation. Business analysis supported restructuring involving more than \$20 million in assets and process improvements associated with nearly \$1 million in reduced sunk costs. Translates fragmented technical and operational information into clear, defensible guidance for leaders and stakeholders.

\$20M+ ASSET ANALYSIS | **~\$1M SUNK-COST REDUCTION** | **2 COMBAT DEPLOYMENTS** | **3.97 CYBERSECURITY GPA**

CORE EXPERTISE

GRC & Risk: Governance, Risk, and Compliance (GRC) • Risk Assessments • Risk Registers • Likelihood / Impact Scoring • Risk Treatment • Control Gap Analysis • Remediation Tracking • Third-Party Risk Concepts

Frameworks & Audit: NIST Cybersecurity Framework (CSF) 2.0 • NIST Risk Management Framework (RMF) • NIST SP 800-53 Concepts • ISO/IEC 27001 • CIS Controls Concepts • SOC 2 Concepts • CMMC Concepts • Audit Evidence • Audit Readiness

Security & Resilience: Policy / Procedure Documentation • Access Control • Multifactor Authentication (MFA) • Data Classification • Incident Response • Business Continuity • Disaster Recovery • Business Impact Analysis (BIA) • RTO / RPO • Executive Reporting • AI Governance

SELECTED CYBERSECURITY & GRC PROJECTS

Small Business Cyber Risk Assessment & Risk Register | Public GRC Portfolio Lab

Remote | 2025 - Present

- Built a public case study covering cloud-based point-of-sale operations, customer data, inventory, suppliers, physical security, employee safety, and recovery planning; developed a structured risk register across 6 risk areas with likelihood, impact, risk score, response strategy, ownership, monitoring notes, and recovery relevance.
- Converted stakeholder evidence into practical safeguards including multifactor authentication, secure transaction capture, backup connectivity, inventory reconciliation, local camera storage, access restrictions, and evidence preservation, using NIST- and ISO-aligned control reasoning.

Security Assessment, Access Management & Incident Response Exercises | Southern New Hampshire University / Independent Development

Remote | 2024 - 2026

- Produced security assessment and remediation artifacts connecting findings to business impact, control actions, ownership, monitoring, and closure criteria; developed an access-management playbook aligned to CIS Controls 5 and 6 covering provisioning, access review, least privilege, privileged access, and account removal.
- Applied NIST SP 800-61 incident response concepts to simulated security scenarios, documenting preparation, detection, analysis, containment, eradication, recovery, escalation, and lessons learned.

EDUCATION & CREDENTIALS

Bachelor of Science in Cybersecurity, Concentration in AI Generation

Southern New Hampshire University | Aug 2026 | GPA 3.97 | President's List

ISO/IEC 27001 Lead Auditor

Mastermind Assurance | 2025

Professional Development: CompTIA Security+ (SY0-701) exam preparation; continuing study in security governance, risk, compliance, and control assessment.

PROFESSIONAL EXPERIENCE

Yard Jockey | Port Operations | Linea Peninsular, Panama City Port

Panama City, FL | Oct 2023 - May 2026

- Operated in a safety-sensitive maritime terminal requiring procedural discipline, equipment accountability, accurate inspection records, issue escalation, and reliable execution across changing schedules and priorities.
- Coordinated time-sensitive equipment and cargo handoffs across teams while documenting discrepancies early to protect safety, continuity, and downstream service commitments.

CDL-A Driver | USPS Contractor | Hickman Transport

Panama City, FL | Apr 2023 - Oct 2023

- Transported regulated mail, hazardous materials, and sensitive cargo under chain-of-custody, Department of Transportation, inspection, safety, and documentation requirements while maintaining schedule integrity and independent accountability.

Commercial Delivery Driver | Surfside Commercial Laundry

Panama City Beach, FL | Sep 2022 - Feb 2023

- Managed independent commercial delivery routes and customer-facing service while maintaining reliable schedules, documentation, asset accountability, and a strong safety record.

Independent Contractor | Business Analytics & Continuity Operations | RYD Solutions

Kansas City, MO | Jul 2013 - Dec 2021

- Supported business analysis, operations, continuity planning, and internal restructuring during a multi-company merger involving more than \$20 million in assets, organizing fragmented information into decision-ready findings for leadership.
- Contributed to process improvements associated with nearly \$1 million in reduced sunk costs by identifying inefficiencies, comparing alternatives, documenting assumptions, and translating operational constraints and cost drivers into practical recommendations.
- Helped redesign procedures, reporting, and continuity practices while tracking issues, stakeholder needs, and follow-up actions across changing priorities.

35F Military Intelligence Analyst | United States Army

Global Assignments | 2005 - 2010

- Collected, evaluated, reconciled, and synthesized multi-source intelligence to identify threats, anomalies, information gaps, unsupported conclusions, and decision-relevant trends for operational leadership.
- Produced recurring assessments, written reports, and executive-level briefings across overseas assignments and 2 combat deployments, translating complex information into concise, defensible conclusions under strict deadlines.
- Protected classified and sensitive information under formal access-control, need-to-know, documentation, accountability, and information-protection requirements; formerly held a Top Secret security clearance.
- Supported tactical and strategic decision-making in high-consequence environments, building enduring strengths in evidence review, source evaluation, confidentiality, analytical judgment, escalation, and communication under uncertainty.

TECHNICAL & ANALYTICAL TOOLKIT

Microsoft 365 • Excel (formulas, sorting/filtering, data review) • Word • PowerPoint • GitHub • Windows • Linux fundamentals • Cisco Packet Tracer • TCP/IP fundamentals • LAN/WAN concepts • VPN and firewall concepts • Security documentation • Technical writing • AI-assisted analysis and documentation

ADDITIONAL QUALIFICATIONS

U.S. Army veteran • Former Top Secret security clearance • Schedule A eligible • Commercial Driver License (CDL), Class A, Tanker and Hazardous Materials endorsements • Open to remote opportunities and roles in Panama City, Atlanta, Tampa Bay, and Orlando
